55 Gallon Silicone Drum Heaters & 5 Gallon Silicone Pail Heater With Adjustable Thermostat

Silicone Rubber Drum and Pail Heaters-Product Description

Silicone rubber drum and pail heaters provide practical, efficient means of freeze protection, viscosity control and maintenance of materials at elevated temperatures. A variety of standard sizes are combined with availability of configure-to-order designs to meet a variety of applications.

Product Highlights: Silicone Rubber Drum and Pail Heaters

- Economical choice
- Good 3.6" (91mm) wide coverage area
- Good durability and flexibility
- Patented grounded heating element meets NEC 427.23
- Easy adjustable thermostat control
- 73/23/EEC

Specifications: Silicone Rubber Drum and Pail Heaters

- Heating element is laminated between two layers of 15mil fiberglass reinforced silicone rubber

- Silicone rubber density of 16.8oz/yd² (570 grams/m²) per layer
- Dielectric strength of over 2000 volts
- Adjustable thermostat: 50o to 425oF (10o-218oC)*
- 450oF (232oC) maximum exposure temperature on heating surface
- Moisture and chemical resistant
- Power cord 6 feet (1.8m) long with
- 120VAC: Standard 3-prong plug (NEMA 5-15)
- 240VAC: Bare wire connection
- The spring closure can be expanded 3" (76mm)
- The NPH Difference: Drum Heaters and Pail Heaters
- Durable and long lasting
- Large heater coverage and high wattages
- Exclusive FM approved hazardous-area silicone rubber drum heater
- Patented grounded heating element
- Easy adjustable temperature control
- Full coverage drum heaters feature an easy-to-use digital temperature controller with audible/visual alarm
- Full coverage drum heaters and insulators maximize heat efficiency
- Variety of standard sizes and configure-to-order options for special vessel heaters

Applications: Silicone Rubber Drum and Pail Heaters

- Viscosity control
- Freeze protection
- Temperature maintenance
- Biofuel / Biodiesel
- Melting of solids
- Heat-up drum contents to a required temperature

- Thermal mixing
- Much more
